

Durable and Reliable Feed Delivery.

Reliable Auger

- Auger manufactured by VAL-CO, in the U.S., where quality control is closely monitored.
- High carbon steel is heat treated and tempered to proprietary specifications to ensure long auger life.
- Each batch of auger is microscopically inspected and vigorously tested before it can be approved for shipment.

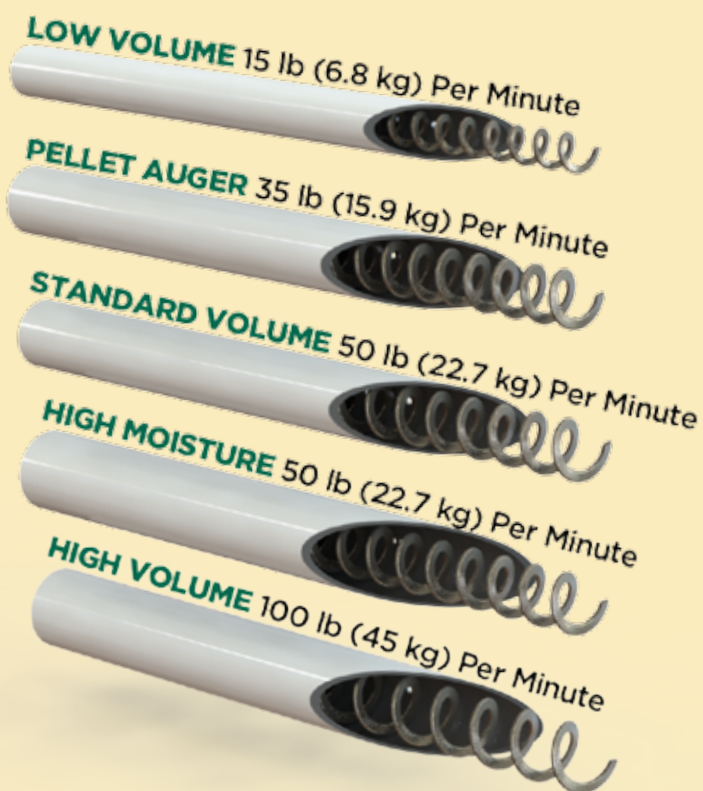

Strong Tubes

- Auger tubes are made of dual layers with a harder, more durable inside and a UV protected outside for maximum longevity.
- Die-formed elbows ensure consistent thickness and tight tolerances.

A double boot, twin transition application for maximum versatility and delivery rate.

FLEXIBLE AUGER OPTIONS

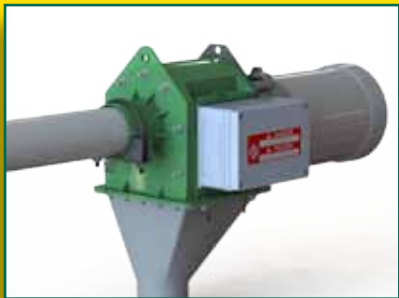

Performance You Can Count On

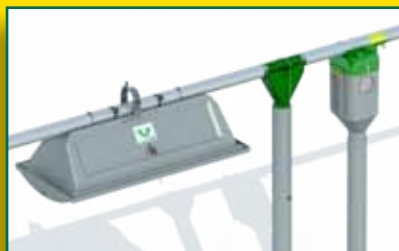

Feed Delivery Components

Clear, green, double, & single transition options.

Poly or steel discharge heads with dependable mechanical or proximity backup sensors.

All-out-drops, volume drops, group drops, and more!

Engineered sensors for your application: level & safety switches, tube & hopper mounted.

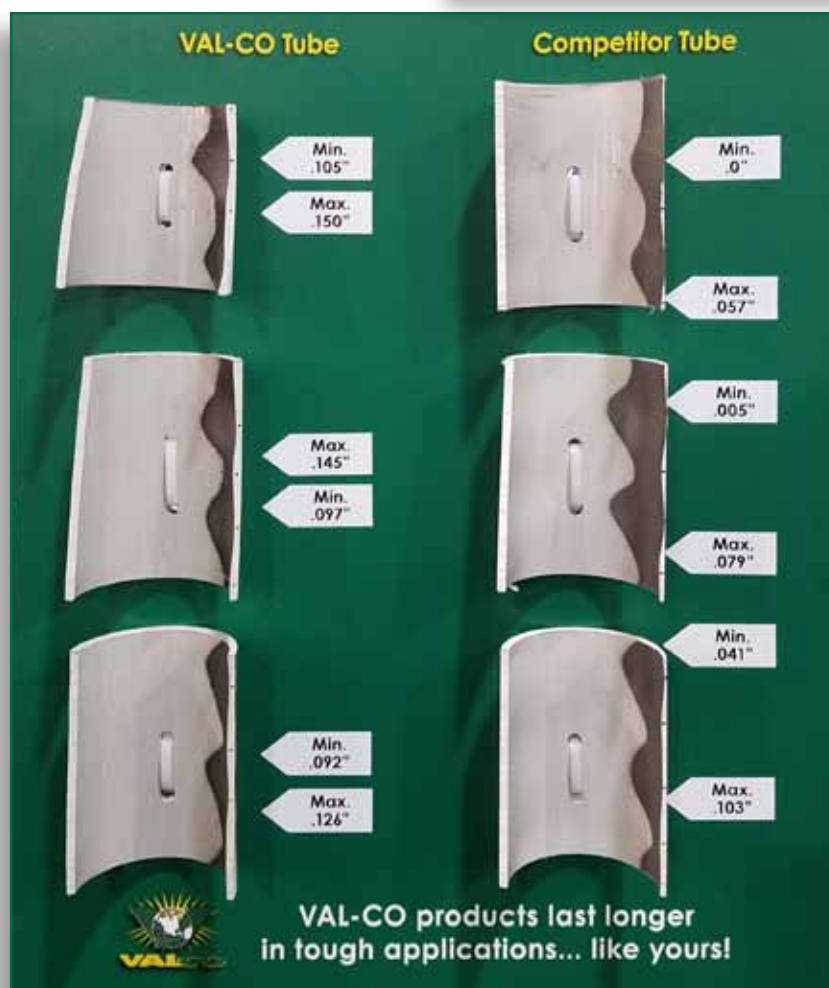

Passing The Test With Flying Colors

VAL-CO put their auger tube to the test against leading competitors and won!

In replicated internal testing, the VAL-CO tube had up to 46% less weight loss after 40 hours of abrasive testing. VAL-CO tube is made from harder plastic and you can see the results in the samples below from a side-by-side test.

The Tube Tester can be seen running at various trade shows. Be sure to check it out!

Call your local **VAL-CO** representative or distributor for more information on these and our other fine products.
